SUMMARY

Aspiring Software Developer with recent experience as a full-stack Developer at Whirlpool. Recent graduate with Honors in Computer Science from Michigan State University, bringing strong skills in Python, JavaScript, Node.js, and React.js.

EDUCATION

Michigan State University | Honors College

December 2024

Bachelor of Science, Computer Science | GPA 3.69 | Dean's List – 5 semesters

Minor in Business and Computational Math

SKILLS

Programming Languages: Python, Java, Typescript, C++, SQL, C, Dart, R, Shell, HTML, CSS

Frameworks / Tools: Node.js, Angular, React.js, MongoDB, Git (version control), Dart, FastAPI, TensorFlow, Pytorch, Azure

Certifications: Agile Development (LinkedIn), CE in Software Development (Microsoft)

PROFESSIONAL EXPERIENCE

Tech Mahindra | IT Intern

June 2024 – August 2024

- Optimized BI charts to track key metrics at Jackson National, delivering revenue-generating insights to stakeholders.
- Leveraged Azure to manage the Enterprise Data Platform and deliver analytical insights, driving a 19% reduction in operational expenses.
- Streamlined data workflows and infrastructure using advanced data engineering, improving workflow efficiency.

Whirlpool | Capstone Full-stack Developer

January 2024– May 2024

- Developed a smart oven API utilizing BERT, which is being integrated into Whirlpool's ovens to deliver personalized recipe recommendations based on user cooking habits, enhancing user engagement and satisfaction.
- Built a full-stack application ensuring compatibility on Android and iOS, and a data-driven dashboard for visualization using JavaScript and Plotly. Improved UX through continuous integration leading to a more intuitive interface.
- Conducted test driven development, achieving 92% accuracy in recipe recommendations based on 100+ user tests.

Michigan State University | Service Center Representative

May 2023 – December 2024

- Delivered exceptional customer service to residence hall students and visitors, effectively managing an average of 50+ inquiries daily, resulting in a 95% satisfaction rate as measured by post-interaction surveys.
- Processed and distributed mail and packages efficiently, handling an average of 50 items per shift, which contributed to a 20% reduction in delivery times and improved resident satisfaction.

PROJECTS

Job Preparation Platform | React, Node.js, Python

December 2024

- Developing an advanced platform using React, Node.js, and Flask to recommend interview-focused coding problems by extracting job skills with high-accuracy NLP powered by Hugging Face Transformers.
- Designed a real-time code execution engine with Piston API, supporting Python, C++, Java, and C, and enabling dynamic code generation for job-specific skill preparation.
- Built a modular backend architecture with RESTful APIs, asynchronous processing, and robust CORS handling.

Custom Python DBMS | Python, SQL

October 2024

- Created a scalable Python module emulating SQLite3 functionality, enabling advanced SQL query and supporting complex data analysis pipelines for real-world database applications.

Smart Grocery Manager | Java, Android

October 2023

- Implemented a grocery management application using Java, leveraging object-oriented principles for scalable code.
- Optimized inventory management by using data structures to dynamically update and categorize grocery items.

INVOLVEMENTS

- Student Accountant | MSU Business and Financial Services (BFS)
- Teaching Assistant & Tutoring | MSU
- Association for Computing Machinery (ACM) | AI Project Manager | Michigan State University
