(517) 402-6868 | byrrajus@msu.edu | [LinkedIn](#) | [Portfolio](#)

EDUCATION

Michigan State University | College of Engineering, Honors College
Bachelor of Science, Computer Science | GPA 3.69 | Dean's List – 6 semesters
Minor in Business and Computational Math

December 2024

SKILLS

Programming Languages: Python, JavaScript, TypeScript, C++, SQL, Dart, HTML, CSS

Frameworks / Tools: Node.js, Angular.js, React.js, MongoDB, Git, Docker, Flutter, FastAPI, TensorFlow, Pytorch, Azure

Certifications: Agile Development (LinkedIn), CE in Software Development (Microsoft)

PROFESSIONAL EXPERIENCE

Tech Mahindra | IT Intern

June 2024 – August 2024

- Optimized BI charts to track key metrics at Jackson National, delivering revenue-generating insights to stakeholders
- Leveraged Azure to manage the Enterprise Data Platform and deliver analytical insights, driving a 19% reduction in operational expenses
- Streamlined data workflows and infrastructure with advanced data engineering, improving workflow efficiency

Whirlpool | Capstone Full-stack Developer

January 2024 – May 2024

- Developed a smart oven API utilizing BERT, now is being integrated into Whirlpool's ovens, to provide personalized recipe recommendations based on user cooking habits, enhancing user engagement and satisfaction
- Built a full-stack application ensuring compatibility on Android and iOS, and a data-driven dashboard for visualization with JavaScript and Plotly. Restructured UI through continuous integration leading to a more intuitive interface
- Conducted test driven development, achieving 92% accuracy in recipe recommendations based on 100+ user tests

Michigan State University | Service Center Representative

May 2023 – December 2024

- Achieved exceptional customer service to residence hall students and visitors, managing an average of 50+ inquiries daily, resulting in a 95% satisfaction rate as measured by post-interaction surveys
- Processed and distributed mail and packages efficiently, handling an average of 50 items per shift, contributing to a 20% reduction in delivery times and enhanced resident satisfaction

PROJECTS

Automated Trading Bot | Python, JavaScript

January 2025

- Engineered a real-time meme coin monitoring system using Tweepy and Twitter API v2 to instantly extract contract addresses
- Improved trade decision-making by implementing DEX Screener API for liquidity and market cap validation
- Optimized Solana transactions using Web3, for faster and more efficient trades

Job Preparation Platform | React, Node.js, Python

December 2024

- Developing an advanced platform using React, Node.js, and Flask to recommend interview-focused coding problems by extracting job skills with high-accuracy NLP powered by Hugging Face Transformers
- Designed a real-time code execution engine with Piston API, supporting Python, C++, Java, and C, and enabling dynamic code generation for job-specific skill preparation
- Implemented a modular backend architecture with REST APIs, asynchronous processing, and CORS handling

Custom Python DBMS | Python, SQL

October 2024

- Created a scalable Python module emulating SQLite3 functionality, enabling advanced SQL query and supporting complex data analysis pipelines for real-world database applications

INVOLVEMENT

- Student Accountant | MSU Business and Financial Services (BFS)
- Teaching Assistant & Tutoring | MSU
- Association for Computing Machinery (ACM) | AI Project Manager | Michigan State University
