SUMMARY

Aspiring Software Engineer with recent experience as a Full-stack Developer, and Data Analyst. Recent grad with Honors in Computer Science from Michigan State University, bringing strong skills in Python, JavaScript, Node.js, and React.js.

EDUCATION

Michigan State University | Honors College

December 2024

Bachelor of Science, Computer Science | GPA 3.69 | Dean's List – 5 semesters

Minor in Business, and Computational Math

SKILLS

Programming Languages / OS: Python, C++, C, C#, Java, Typescript, SQL, Dart, R, Shell, HTML, CSS, Linux

Frameworks / Tools: Node.js, Angular, React.js, MongoDB, Git, Flutter, FastAPI, Pandas, TensorFlow, PyTorch, Azure

Certifications: Agile Development (LinkedIn), CE in Software Development (Microsoft), Software Engineer (HackerRank)

PROFESSIONAL EXPERIENCE

Tech Mahindra | IT Intern

June 2024 – August 2024

- Tracked key metrics at Jackson National by managing and optimizing cross sectional BI Charts to deliver essential revenue generating insights for stakeholders.
- Maintained the Enterprise Data Platform in Azure, presented analytical findings to business units for team analysis and decision making contributing to a 19% reduction in operational expenses.
- Applied data engineering methodologies and cloud technologies, to address complex business challenges by optimizing data workflows and infrastructure, leading to a 15% improvement in overall workflow efficiency.

Whirlpool | Capstone Full-stack Developer

January 2024– May 2024

- Developed a smart oven API utilizing BERT, which is being integrated into Whirlpool's ovens to deliver personalized recipe recommendations based on user cooking habits, enhancing user engagement and satisfaction.
- Built a full-stack application ensuring compatibility on Android and iOS, and a data-driven dashboard for visualization using JavaScript and Plotly. Improved UX through Continuous integration leading to a more intuitive interface.
- Conducted test driven development, achieving 92% accuracy in recipe recommendations based on 100+ user tests.

Michigan State University | Service Center Representative

May 2023 – December 2024

- Delivered exceptional customer service to residence hall students and visitors, effectively managing an average of 50+ inquiries daily, resulting in a 95% satisfaction rate as measured by post-interaction surveys.
- Processed and distributed mail and packages efficiently, handling an average of 50 items per shift, which contributed to a 20% reduction in delivery times and improved resident satisfaction.

PROJECTS

Job Preparation Platform | React, Node.js, Python

December 2024

- Developing an advanced platform using React, Node.js, and Python (Flask) by extracting job skills to recommend coding problems to excel in interviews leveraging Hugging Face Transformers for high-accuracy NER.
- Designed and implemented a real-time multi-language code execution engine integrated with the Piston API, supporting Python, C++, Java, and C, along with a dynamic code generation feature for job-specific skill prep.
- Built a modular Backend architecture with RESTful APIs, asynchronous processing, and robust CORS handling.

Custom Python DBMS | Python, SQL

October 2024

- Created a scalable Python module emulating SQLite3 functionality, enabling advanced SQL query and supporting complex data analysis pipelines for real-world database applications.

Smart Grocery Manager | Java, Android

October 2023

- Implemented a grocery management application using Java, leveraging object-oriented principles for scalable code.
- Optimized application performance by managing activity lifecycles efficiently, and memory management.

INVOLVEMENTS

Student Accountant | MSU Business and Financial Services (BFS) , Teaching Assistant & Tutoring | MSU

Association for Computing Machinery (ACM) | AI Project Manager | Michigan State University
